## **System Pressure Advisory!**

The water consumers of the Town of Canton on Pasadena Street Only in Haywood County are experiencing periods of low pressure and outages in the distribution system due to a 4-inch water line break that affects Pasadena Street. Periods of low or no pressure in the distribution system increase the potential for back siphonage and the introduction of bacteria into the water system.

Therefore, the Division of Water Resources advises that when water is restored consumers boil all water used for human consumption (including drinking, making ice, brushing teeth, washing dishes, and food preparation) or use bottled water.

Vigorous boiling for one (1) minute should kill any disease-causing organisms that may be present in the water.

This office is strongly urging water consumers to conserve water whenever possible. This advisory remains in effect until further written notification is issued.

This advisory was issued on July 21, 2023 by:

Town of Canton  
828-648-2363

[Insert the following paragraph, if recent historical data indicates nitrates have been detected in the source water at a level great than or equal to 9mg]

Boiling water concentrates any levels of nitrates that may be present in the water. Infants below the age of six months and pregnant women should use an alternate water supply. (e.g., bottled water) whenever possible.
